

To Whom it May Concern

Halton Borough Council has employed Souters Sport for a three year period to carry out a major refurbishment and drainage works contract to most of the Council owned sports pitches, at an approximate value of £800,000

The works have consisted of a combination of verti-draining, topdressing, main pitch drainage and sand slitting operations. I have found Souters Sports to be well organised both administratively and in the organisation of site operations. Their staff have been polite and proactive in resolving those inevitable practical problems that always arise when carrying out the works. They have been flexible and able to respond to changing site conditions, for example the extensive drought during July 2006, and to accommodating the 'whims' of the client.

Based upon my experiences I have no reservation in recommending them to other organisations considering carrying out similar works.
