To Whomever it may concern

During the spring of 2009, Souter's Sports Limited re-constructed the top surface of two Rugby pitches for me and then Koro Top Drained both of them.

All work was carried out to a exceptionally high standard, right from planning through to the execution of works with no rushing involved, which sometimes happens when using sub-contractors.

I was delighted with the finished product and have no doubts about recommending them to anyone or re-kindling our partnership in the future.
