

To Whom it May Concern

Liverpool City Council has employed Souters Sports Limited over a 4 year period as part of a major refurbishment programme on the Council's natural turf sports pitches, at an approximate value of £2 million.

The works included extensive renovations, drainage, cultivations, verti-draining, top dressing, sand slitting and post completion maintenance operations which were supervised by our external consultants Professional SportsTurf Design. The City Council has funded these works via a combination of grant from the New Opportunities (Greenspaces) Fund, Football Foundation, Lottery Funding, Barclays, European Objective One and NRF. These works included the relocation of grass pitches as part of the new stadium for Liverpool Football Club.

Souters Sports Limited are a well organised company in terms of administration and on-site operations and have a very proactive approach in solving any potential site problems during the course of the works.

Based upon our experiences I have no reservation in recommending Souters Sports Limited to the public or private sector considering carrying out similar works.
